

Treatment and filtration solutions for your Copper Nickel Chrome lines.

VENTURI AGITATION

Airless bath agitation

Better bath homogenization ensuring superior quality treatment of the parts. Significant energy savings on hot processes.

FILTER L + OILTECH

Oil filtration

The microfiber filler absorbs oil. A 500 g filler can recover up to 6 l of oil.

L FILTER + L-TECH

Fine particles filtration

High capacity filter cartridge with a mesh size of 1, 5 ou 10 μm (20 μm for Cr 6).

IONIC EXCHANGE RESIN

Recovery of polluting metallic ions

Recovers metals polluting the process from the liquid into ion form : specially developed resin.

L FILTER + BAGTECH

Large particles filtration

Enables filtration of large quantities of generated particles.
