

# Filtration and recovery solutions of precious metals

- L30 / L50 FILTER**  
**Particles filtration**  
Filtration from 1.5 à 10 µm.
- MC15 FILTER**  
**Metalic particles filtration**  
Filtration from 1.5 à 10 µm.
- ELECTRUM**  
**Precious metals recovery**  
Designed for the recovery of high concentration precious metals. With Eau additive to break cyanids (stripping).
- R3 / R12**  
**Metals recovery**  
R3 bath volume < 100 l  
R12 bath volume > 300 l

<sup>1</sup> R3 or R12 depending on the volume of the bath and its concentration to recover the last precious metals ppm.

<sup>2</sup> To remove precious metals on the racks or defective parts.

# ELECTRUM

**Gold, palladium...**

SIRELEC 52799 or SIRELEC 52808 classic, complete with captive cartridge 1 or 5 kg.

**Silver, cadmium, zinc, copper, common metals...**

Cost efficient alternative : simple electrum SIRELEC 53198 without rectifier with non-captive cartridge ref. 19660.

*Non-captive (left) & captive (right) cartridges*
