

Filtration solutions for the priming of steel before painting

P FILTER + L-TECH

Fine particles filtration

4 high capacity filtration cartridges with a mesh ranging from 1 to 50 μm .

P FILTER + OIL-TECH

Oil filtration

The wide exchange area of microfibers allows to collect fat particles easily and in quantity.

OU

COALESCER

Recovery of floating oils

The gravity technology allows a better dephasing.

VERTICAL PUMP

Transfert of charged fluids

Dry running possible.

L FILTER + BAG-TECH

Large particles filtration

Filtration bag designed for the filtration of particles from 50 to 100 μm .

HORIZONTAL PUMP

Mechanical seal

This pump design ensures the transfert of charged fluids without issues.
